

PROFILE

I am a third year undergraduate of Babcock University with over 2 years of experience in Web development.

I like to think of myself as a problem solver. I believe there are different ways to solve a problem and I like to make analysis and choose from my options. I love solving mathematics and coding. I also love being around people who share the same goal as myself.

PERSONAL PROJECTS

Simon Game

A game that tests the memory strength of the player. It creates a series of light and tone and requires the user to repeat the sequence.

Link: sanite1.github.io/simongame

Dice Challenge

A game that creates random dice tosses and determines the winner at each toss (refresh).

Link: sanite1.github.io/dicee

And many others seen on my portfolio page...

SKILLS
